NARRATI	VE							

On 11/06/22 while working patrol in a marked patrol unit, wearing a full SAPD uniform, I responded to the listed location for a report of a motor vehicle crash, hit and run.

Upon arrival I contacted the driver of the listed Honda Civic, Unit 2 as referenced in the supporting crash report. The driver of U2, V1, stated that he and his passenger, O1, were stopped in the left turn lane to go from Redland Rd onto Jones Maltsberger Rd. While waiting at the light, V1 stated that the listed Jeep Wrangler, Unit 1 as referenced in the supporting crash report, was traveling NE on Jones Maltsberger. V1 stated that U1 then turned right from Jones Malstberger onto Redland Rd but when doing so the vehicle traveled wide entering the on coming traffic lanes of travel. U1 hit U2 head on causing major damage to U2. V1 stated then U1 left the location. V1 stated that while he was waiting for police arrival after the crash, W1 returned to the crash location stating he had observed the crash and followed U1 and knew where it had stopped.

Once completed with the crash scene I relocated to the secondary location where U1 had stopped. This address matched the registration address obtained from running the vehicle s license plate. Upon arrival the vehicle was observed parked in the driveway where it had contacted the garage door. The vehicle was running but was unoccupied. The drive side window was down and the back gate of the vehicle was open. I attempted to contact a resident at the location but no one came to the door after I knocked several times. As I was going back to my patrol vehicle, I heard a moaning sound coming from the backyard of the location. The gate was open and I could see a male, S1, lying on the ground. I approached S1 and saw a laceration to his head. S1 was wearing a black Polo shirt and light khaki shorts. I contacted S1 and observed him to be slow to answer questions, confused about recent events of the evening, and once he was standing was very unsteady on his feet. I called for an EMS unit to evaluate S1. SAFD made location and reported that S1 was able to answer all their

questions appropriately and was allowed to refuse medical care. I spoke with S1 again asking who was driving his vehicle, if he knew the vehicle had been involved in a motor vehicle crash and other general questions about the events that evening. S1 either refused to answer my questions or would provide vague answers. S1 did state that he was not driving his vehicle that night. While speaking with S1 I could smell an odor consistent with alcoholic beverages coming from S1. Based on the information I had at that time I left the location without further action.

I attempted to contact W1 by phone to ask clarifying questions about what he had observed. W1 was able to call me back after several attempted calls. W1 stated that he observed the crash and went to check on the occupants of U2. W1 stated he observed U1 leave the scene and he decided to follow the vehicle home. W1 stated he observed an older white male, wearing a black shirt and light blue shorts exit the driver door of U1 when it parked in the driveway at the listed registered address.

Based on my preliminary investigation it was believed that S1 was involved in a motor vehicle crash on a public roadway. Following the crash, S1 left the location without providing any identifying information to the driver of the other vehicle involved, U2. I completed the crash report and the offense report and returned to service.

COBAN and body worn camera are available for this incident.
